

16" Certa-Lok Pulling Head Ordering Instructions

Certa-Lok pipe comes in two different styles:

Retrained Joint (RJ)

Retrained Joint Integrated Bell (RJIB)

The size of the spline groove **varies** between the two pipe styles for the 16".

Retrained joint (RJ) pipe uses a different spline depending on the DR of the pipe:

DR 25—0.375" x 0.625" spline

DR 21—0.375" x 0.625" spline

DR 18—0.375" x 0.625" spline

DR 14—0.500" x 0.750" spline

Retrained joint integrated bell (RJIB) only uses the following spline:

All sizes—0.500" x 0.750" spline

The purchase order must specify the pipe (**RJ or RJIB**) and its **DR** and/or dictate the **dimension of the spline** being used for the pull.
